SHAW'S DRUG STORE ENTERED WEDNESDAY

Smashing a window at the rear of Shaw's Drug Store on Wednesday, Jan. 2nd, thieves enter the store and stole with a small amount of narcotics.

The thieves were interrupted at their work by Chas. Graham, the night watchman. Mr. Graham was the owner of one of "the few houses where Jackson's treat" is served. He knew that no Jackson's house had asked the man to come in; the man he saw was warning him and talk the matter over. Mr. Air. Graham turned to close the door, the burglar hit him on the head with his gun. The thief got away with \$100. The thief, later, stolen from Calvary, was found near Carbon.

CARD OF THANKS

We wish to thank all those who contributed and assisted in any way during the recent disastrous fire at our garage in which we lost our equipment.

Cockshutt Plow Issues Booklet

With the thoughts of helping returned veterans of World War II who have a desire to take up farming the Cockshutt Plow Company has published a booklet titled "Farmers' Guide to Farming". It is now available to those who want to know where to choose a farm, the type of soil test best suited for growing crops; the breeding and care of live stock and the like. Copies may be secured from any of the 180 Cockshutt dealers in Canada.

THE WORLD OF WHEAT

Dr. W. F. Hanna, newly appointed Officer in charge of the Dominion Laboratory of Plant Pathology at Victoria, and who served with distinction in the war, has been in touch with the management of Mr. F. P. F., recently addressed the Manitoba Agricultural Society at a luncheon given in his honor.

Dr. Hanna offered the opinion that Manitoba wheat will be satisfied with the amount of rain that will maintain the food supplies of the Armed Forces during these dark days of the First Great War. When wheat was scarce similarly, said Dr. Hanna, rainfall conditions, which have done much to maintain adequate supplies of foodstuffs during the present war, for several years past, have not been like those last year. Had our wheat crops consisted of the same rust susceptible sorts which were produced 1939 or 1940 our crops harvested during the war years would have been several hundred millions of bushels less than they are today. The wheat that survived rust, and which would have gone down under the rust, represented the very surplus that was available and which Armed Forces and populations so badly needed.

Here we see, then, an important contribution by many of our Prairie farmers, together with the invaluable help of our plant breeders and plant pathologists, who produced earlier Marquis before it was too late, and who resisted varieties fast before this present war.

MAY HAVE ESCAPED IN SWORN CAR

Burglars who broke into Shaw's Drug Store sometime Wednesday night last are believed to have escaped in a car. They were seen this morning after abandoning another one which they had stolen from Calvary. Gibson, a former seven months' sergeant of Carbon, reported to R.G.M.P. that his 1939 coupe had been stolen from his garage. No trace was ever made of the car. The thief, later, stolen from Calvary, was found near Carbon.

Business College Honored

High honors have come to the Calgary Business College since its school of business training has just been accepted as a fully accredited member of the American Association of Correspondence Colleges.

This is the first time that Carbon will be awarded a diploma that carries international recognition. Other schools of the A.A.C.C. are located in Canada, but not in the United States as well.

The Calgary Business College was founded in January, 1940, by the Rev. Mr. John C. Stewart, who quickly won recognition because of his many contributions to the field.

The school has been granted a diploma that carries international recognition because of its many contributions to the field.

FISH AND GAME ASSOCIATION STATEMENT

Receipts from the recent membership drive of the Carbon Fish and Game Association amounted to \$3,000. Expenses for the banquets were \$1,025.30, leaving a balance of \$1,974.70.

A general meeting of the association will be held in late February or early March.

The convention will attend a two day session in Lethbridge on January 21 and 22.

Mr. and Mrs. A. J. Johnson, Harold and Irene, and Mr. and Mrs. T. E. Larson and Patricia, all of Calgary, will be holiday visitors at the home of Mr. and Mrs. H. Greenlee.

Mr. and Mrs. W. C. Friesen of Stettler will be New Years visitors to Carbon.

Mrs. G. Lewis spent the Christmas holiday with her daughter, Mrs. R. Garret.

Mrs. Goodwin was out from Carbon for New Years and spent the day with Mrs. Lewis.

J. Noddy spent the holidays at the home of his grandmother, Mrs. H. Hunt.

Glen Lovagoo spent the holidays in Calgary. Wonder why?

Miss J. Milligan is spending a few days at the home of her parents.

Dusty Paxton spent Boxing Day in Drumheller at the home of Mr. and Mrs. N. Foxon, Jr.

Recent hockey scores were Rockford 8, Carbon 5; Tschuhi Carbon, 1; Beiseker 5, Carbon 3. Three Hills defeated Carbon 12-4.

Mr. Andrew Holmes of North Barrie was a regular visitor at the home of his sister, Mrs. Shirley, for nearly a month. It was the first time for 41 years that brother and sister had met.

Secretary's of local clubs and lodges are invited to send in accounts of their meetings for publication in the Chronicle. There is no charge.

VOCALIST

WEDDINGS

WASHBURN - THORBURN

The United Church Manse was the scene of a wedding service when Margaret and John, only daughter of Mr. G. R. Thorburn, St. Albert, Alta., became the bride of Edward William Washburn, student of Mr. and Mrs. Frank and Mrs. Robert Provost, E. Longmire officials.

The bride was an afternoon daughter of plain cravat wearing father of pink dress. Her maid of honor, a blonde, formed her corsage. Miss Nan Finlay, bridemaid, wore an orchid blue dress with a lace sash and a pink carnation and baby rose.

Later a crowd of 40 guests assembled at the home of the groom's parents. The bride's table was centerpiece of the wedding breakfasts with white streamers. Mrs. Victoria Knight of Edmonton entertained the guests dressed in mauve. Guests dressed in mauve, pink carnations and baby roses.

The young couple will reside in Provost. —Provost News.

LOCAL NEWS

Mr. and Mrs. W. Ross were recently visitors in Carbon.

Mr. and Mrs. R. Campbell spent Christmas at Red Deer.

Mrs. S. Templeman of Edmonton was a weekend visitor at the home of Mr. and Mrs. C. Trumbull.

Mr. G. Ohlhausen of Turner Valley was a regular business visitor to Carbon last week-end.

Mr. and Mrs. C. H. Nash and Mr. and Mrs. N. Nash spent Christmas at Carbon.

Mr. and Mrs. W. C. Friesen of Stettler will be New Years visitors to Carbon.

Mrs. G. Lewis spent the Christmas holiday with her daughter, Mrs. R. Garret.

Mrs. Goodwin was out from Carbon for New Years and spent the day with Mrs. Lewis.

J. Noddy spent the holidays at the home of his grandmother, Mrs. H. Hunt.

Glen Lovagoo spent the holidays in Calgary. Wonder why?

Miss J. Milligan is spending a few days at the home of her parents.

Dusty Paxton spent Boxing Day in Drumheller at the home of Mr. and Mrs. N. Foxon, Jr.

Recent hockey scores were Rockford 8, Carbon 5; Tschuhi Carbon, 1; Beiseker 5, Carbon 3. Three Hills defeated Carbon 12-4.

Mr. Andrew Holmes of North Barrie was a regular visitor at the home of his sister, Mrs. Shirley, for nearly a month. It was the first time for 41 years that brother and sister had met.

Secretary's of local clubs and lodges are invited to send in accounts of their meetings for publication in the Chronicle. There is no charge.

Rosalind Tricker, Swalwell, Married

An impressive ceremony took place in the Swalwell United Church recently when Rev. Mr. Erskine Pow united in the bonds of holy matrimony Irvin Broome and Rosalind Tricker of Barrie, Ont., and Rosalind Tricker of Swalwell. The bride was a beautiful white gown of satin and netting, with a lace train and a lace belt. She was attended by Vivian Irene Gibson, also in white net, carrying a bouquet of pink roses. The groom was Eddie Broome.

Miss Elma Broome presided at the organ, and during the prelude the minister, groom and bride stood in the choir loft. The bride was the daughter of the Rev. Mr. Pow, who was present.

After a few days in the neighborhood the newlyweds left for Barrie where they will make their home.

LARGE CROWD ATTENDS CHRISTMAS CONCERT

VETERAN GUESTS
OF LIONS CLUB

BEISEKER - The Beiseker Lions entertained about 55 veterans of the many armed services at a turkey dinner in the Lions club rooms recently.

Speakers representing the church, council and various organizations welcomed the returning veterans. The speaker for the evening was Sgt. Major A. H. Stewart of Medicine Hat. The subject of his address was the improved services given wounded of War Two.

COUNTRY CLUB
CARNIVAL FRIDAY

Don't forget the Community Club Carnival at the local ice palace on Friday evening, January 11th. Good cash prizes for costumes and races. Lots of fun for young and old. Support the Community Club.

One of the best Christmas contests ever held in Carbon was presented in the Scout hall on Friday, Dec. 21st, by the students of the Carbon High School, under the title "Merry and Joyous Days", and was presented in three acts. The first act took place in an orphanage, the second with the children on the mounds of a young hill and the third back at the orphanage. Miss John and Mary are distributing gifts sent by the king, to the poor children.

Every child had a part and was well trained. The choruses were excellent, both behind the scenes and the Juniors in front. Much credit is due the teachers for the scenery and the costumes.

Mrs. Schulte was the accompanist for the singing. The attendance was good. Santa Claus made his annual appearance and distributed treats to the children.

Why Did Jesus Christ Die On Calvary's Cross?

— TO TAKE THE PUNISHMENT FOR YOUR SIN —

How Do You Know You Are Saved?

JOHN 1:12.

2 BELIEVE — 1 Corinthians 15: 3

(a) That Christ died on Calvary to take the punishment for your sin.

(b) That He rose from the dead.

3 Simply say "THANK YOU!" to the Lord for shedding His precious BLOOD on Calvary to take the punishment for your sin.

Matthew 26:28, 1 John 1:7-10.

4 Confess Christ before men.

Matthew 10:32 and 33.

Romans 10:9 and 10.

Teach The Truth

THERE ARE MANY APPROACHES to the problem of eradicating Naziism from the minds of the German people, and of establishing a sane and immovable national attitude. One of the most effective methods is to allow every means they could devise to sow seeds of discord, treachery and hate in the minds of both children and adults, and the task of undoing their evil work is an enormous one. One of the most direct and effective ways of dealing with the problem is through the schools, and work has been done in this direction by the education of the German educational system. In the British zone in Germany millions of school children have been brought up with arrangements to open schools and secure teachers as textbookists. At the middle of October it was reported that some 6,500 schools had been re-opened, with an attendance of approximately 1,150,000 pupils.

The greatest difficulty in the way of re-organizing the educational system has been in securing suitable textbooks. Books which had been used in the schools during the Nazi regime contained military and Fascist propaganda and were removed from use. The order of British German authorship were brought back into use after being thoroughly examined and found suitable. In spite of the serious paper shortage one German book has already been printed for use in the lower grades in elementary schools. An experimental textbook for teaching English to Hamburg children is being written by the British. School broadcasts are used to help fill gaps left by shortages of textbooks and papers are also used for this purpose. Teachers are chosen with great care, and it has been possible to find many who are anxious to undo the harm done by the Nazis and to teach the new generation of Germans that hate and greed are weak.

Critical Lack Of Buildings

The shortage of school buildings has also proved a difficult problem and at the beginning of the period of British rule there were none available, all having been destroyed by fire or otherwise. In most districts and often several schools are built on one building, schools held being held in the evenings. The children are faced with many difficulties. Older children have been taught Nazi principles, and they must be re-educated. Younger children are retarded because of the disturbance caused by constant raids and the general confusion which preceded the collapse of Germany last spring. "Teach the Truth" is the basis of education by the British in Germany, and it is to be hoped that through this, foundations may be laid for a new democratic Germany which will comprehend the values of peaceful living and co-operation with other nations.

SMILE AWHILE

A waitress asked me what I wanted. "I feel like a sandwich," I said. She said, "Just give me your order. Don't blame me if the place is overcrowded."

The optimist believed that the time is ripe.

The pessimist is convinced that it's rotten.

"Aren't you wearing up for dinner tonight?"

"It's no use. With this cold I can hardly speak."

Husband: "That racket? Oh, that's the coal men dumping the coal in the basement."

Wife: "But I thought you ordered out for the year."

"Poor old Bill, he's workin' himself to death."

"Honey, he's workin'."

"Well, what that short-sighted 'e can see when the boss ain't lookin' in?"

Blah! Don't you think I'm a good idea to rate all cars according to their horse power?

Drake: Not as good as getting all drivers according to their horse sense.

Hard work never killed any one.

That's the trouble, Dad. I want to do something with the spice of danger in it."

Bachelor Uncle: "How is the baby?"

Proud Father: "Six months."

Bachelor Uncle: "Talk yet?"

Drake: "Not yet."

Bachelor Uncle: "Boy oh boy!"

Husband: "That racket? Oh, that's the coal men dumping the coal in the basement."

Wife: "But I thought you ordered out for the year."

"Poor old Bill, he's workin' himself to death."

"Honey, he's workin'."

"Well, what that short-sighted 'e can see when the boss ain't lookin' in?"

WHERE HE LEFT OFF

An Army captain walked into the library at Baltimore and asked for a copy of Margaret Steens novel, "The Captain's Daughter".

The Captain, a high official, said the captain explained he had read as far as page 735 when he went to war in 1914 and had been unable to finish the book. He had 441 pages to go.

FIRST OIL WELL

Real beginning of the petroleum industry of the world date back only to the middle of the 19th century, when the first oil well was sunk in deliberate search for a supply of black gold.

An Old Problem

How To Open Sardine Cans

Puzzling British People

Britain is obtaining 28,000,000 tins of sardines from Spain, and the old problem of how to open a can of sardines has been raised again in post-war form. Letters in the newspapers have raised the question why, in this modern age, someone does not invent an easy method of getting sardines out of cans. Dr. G. H. Smith, when sardines were scarce, the tins were often distributed without the key which is intended for opening them.

BRITAIN IS OBTAINING 28,000,000 tins of sardines from Spain, and the old problem of how to open a can of sardines has been raised again in post-war form. Letters in the newspapers have raised the question why, in this modern age, someone does not invent an easy method of getting sardines out of cans. Dr. G. H. Smith, when sardines were scarce, the tins were often distributed without the key which is intended for opening them.

Herd Of Buffalo At Elk Island National Park Is Well Maintained And The Finest In North America

SOME Canadian citizens are going to be able to enjoy buffalo meat again next Christmas. Due to a healthy increase in the number of buffalo at Elk Island National Park, Alberta, it has been decided in the interests of sound wildlife management to slaughter a limited number of surplus animals between now and Christmas in order to keep the herd well within the grazing capacity of the park.

The buffalo at Elk Island are in fine condition and the herd is kept near 1,000 head. The chief remnant of the original stock acquired by the Canadian Government during the first world war is still present and have been well maintained and the herd is now regarded as the first contribution to the herd on the North American Continent.

Mention of the buffalo always conjures up visions of early days of the west, the cattle drives, the covered wagons, Buffalo Bill, Indian wars, part of the red-coated mounties, the chise, stampeding herds and the wholesale slaughtering of the defenceless merely for their hides. Often the buffalo carcasses were left to rot by the hundreds, as apparently there was no market upon which to dispose of the meat in those days, however choice in quality it may have been.

To the early hunter and trader the supply must have appeared almost inexhaustible. We find that millions of buffalo roamed over the wild animal kingdom stretching from Manitoba to the foothills of the Canadian Rockies. Nowadays in the West looked upon the buffalo as a menace to their crops. Individual hunters killed between 1,000 and 2,000 animals annually, and the total hide was short lived. The buffalo gradually became scarce and finally became dead in the rural districts, and the summer months did their work. Lightning strikes are always to blame.

The truth is that the farm is not vouchsafed safety. Being brought up with the cattle, the calves are kept, and children become used to the animals and often very lost sight of the danger of being too familiar. The people who live in the country are in danger of the dangers of the streets, and almost by instinct he learns to beware of the animals. It is to be hoped that the majority of accidents take place outside the cities—Chatham News.

Phantom Fleet

DUNGEON Ships Were Used During The War To Decoy The Enemy

Dummy ships, known for security purposes as Fleet tenders, were quickly built in the early days of the war by the way of adapting merchant ships to resemble "R"-class destroyers and an aircraft carrier.

The ships were assembled on the instruction of Mr. Churchill, as First Lord of the Admiralty, to divert the attention of the German submarine fleet away from the British Isles. A good-sized boat, built up partly from ordinary fishing boats, had a structure of plywood and canvas, suitably painted. For nearly two years these phantom ships hoaxed the German submarine fleet into attacking them.

The metal itself is in the shape of a Maltese cross and embossed in the centre is the Royal Crown.

The crew, standing in the bows,

The two former were converted into the 35,000-ton heavy巡防駁船 (Revenge and the third) and the third into a 12,000-ton aircraft-carrier Hermes.

Their holds were filled with thousands of dummy stores to give the impression that they were full of oil.

Each ship was to be armed with

torpedoes, depth charges and bombs.

By 1941 these dummy warships had been converted into the 35,000-ton heavy巡防駁船 (Revenge and the third) and the third into a 12,000-ton aircraft-carrier Hermes.

They had been fitted with thousands of dummy stores to give the impression that they were full of oil.

Each ship was to be armed with

torpedoes, depth charges and bombs.

Elk Island National Park occupies part of the extensive undulating region known as the Beaver Hills. It is a natural range not far from the border of the prairie, and big game animals, including elk, moose and deer, make hunting studies an attraction. Here they catch a glimpse of life in western Canada as it existed before the days of what we call civilization, and a better appreciation of the importance of wildlife management in the Canadian economy.

Rubber Surplus Seen

Keen Competition Between Producers And Syndicates Expected

The world now faces a huge rubber surplus for the next two or three years.

This is the conclusion of an international "rubber study group" of British, American, French and Dutch experts who have just concluded their meeting in London and their report was released simultaneously there and in Washington.

In their recommendations for production controls among the countries which produce natural and synthetic rubber, it is the way appears to be open for competition on a cost basis between the manufacturers of synthetic rubber in the United States and the producers of natural rubber in the Malaya-Dutch Indies area.

Colors are flags carried by unmounted units, standards by mounted or motorized troops, and ensigns are flown by ships.

Commercial Printing

Do not try to economize on necessary expenses. Neatly printed business stationery is just as important to your business as any other of your necessary expenses, and it is poor economy to do without it. Blank writing paper and forms on which your name is written in with ink do not raise the prestige of your business. And if it's economy that you want, see us and find that our new prices are most reasonable.

Still Needs Your Dollars

Did you forget in the pre-Christmas rush, to send in your contribution for Christmas Seal Fund? Contribution to the all-year fight against Tuberculosis.

Christmas is past, but the fight must go on. Your dollars are still needed. If you forgot to send them in before Christmas, send them in now to:

YOUR LOCAL COMMITTEE OR

ALBERTA TUBERCULOSIS ASSOCIATION

340 - 7th Ave. West, Calgary

**Hesketh Red Cross Raffle**

The winners of the prizes raffled by the Hesketh Red Cross which were drawn for on December 19th were as follows:

First Prize: Machines, R. wheel; Turkey, C. Edwards, Denmeadler; painting, Jas. Gordon, Carbon; plow cases, Mrs. Koenig, Carbon; plow cases, Mrs. Johnson, Carbon; both towns; L. Gutman, Carbon; three quarts; R. Hunter, Carbon; three quarts; fruit, Mr. Toshack, Denmeadler.

Gas Price Up

The price of Alberta crude oil producers will be increased 4¢ a barrel, effective January 1st, because of shipping and other white products to motorists and all other consumers in Alberta and Saskatchewan and parts of Manitoba will receive a two-cent increase. These changes will probably be permanent.

The increase in the price of crude oil will average about 87 percent and will mean an increase in the expense of pumping wells of from 20 to 100 percent. It will do no good the search for more oil.

No Host Dinner

A no-host dinner was held by the G.I.T.L. club at the home of Mrs. L. Paxon. A good time was had and Santa presented each girl with a gift

Way of Life

OUR WAY OF LIFE, a montly publication of Free Enterprise made its appearance a few weeks ago. It is published by Radio Free Press, Peoria, Illinois. Free Enterprise Bureau, set up in 1942. The magazine is a non-partisan editorial and comment review, created Free Enterprise through its

Streets (not cities) range). This new bullet will penetrate nearly two feet of solid wood, so remember to keep your heads down.

If anyone we know has a broken arm which he received from fighting for a woman's honor. It seems she wanted to leave it.

Man—So you son, John, is in college? How is he making it?

Dad—I make it, he's spending it.

A few weeks ago I heard George gave me his heart.

Ruth—Well, he gave you damaged goods, dearie, because the night before he told me he'd broken it.

Trofie—Don't you know what I mean when I hold up my hand?

Lady Driver—I should, I've been a school teacher for a long time.

OFF THE RECORD

OTTAWA—It is said that some of the war criminals cannot endure the cruelties of their long trials but it is our opinion that this is nothing compared to the cruelties they have to undergo if they have to undergo it.

OTTAWA—It is said that some of the war criminals cannot endure the cruelties of their long trials but it is our opinion that this is nothing compared to the cruelties they have to undergo if they have to undergo it.

Ottawa, last year, 32,565 of the babies born were classified to Prince Edward, 9,750, to O.A.C. No. 21, 8,426, to Samita, and 9,112 to the rest of the provinces. The total birth rate among the own districts, occupied by different varieties, Reports, herein summarized, received from 1,961 grain buyers.

Montana, last year, 32,565 of the babies born were classified to Prince Edward, 9,750, to O.A.C. No. 21, 8,426, to Samita, and 9,112 to the rest of the provinces. The total birth rate among the own districts, occupied by different varieties, Reports, herein summarized, received from 1,961 grain buyers.

O.A.C. No. 21, the leading variety in Saskatchewan, occupied 27% of the acreage, and was followed by Prince Edward, 13%; Samita, 12.5%; Prospect, 12.7%; Regal, 9.2%; Trebi, 9.1%; Rex, 7.4%; and Rex Extra, 6.8%. The total acreage recommended for Saskatchewan last year came from: O.A.C. No. 21, Plush, Newal, Regal, Prospect, Rex and Hamer, all secured from the 20-year-old soil survey. The recommended varieties, O.A.C. No. 21, Olli, Newal, Samita, and Trebi constituted 75% of the acreage.

Alberta, O.A.C. No. 21, Newal and Trebi were the varieties of major importance occupying 29.6%, 18.5% and 22.0% respectively, of the acreage, while the others occupied 13.5% and others 10.4%.

The recommended varieties recommended for the various soil conditions should be considered by all farmers when plans are being made for sowing operations.

Conclusion

Although the percentage of recommended varieties is not high for the various types of prairie, the above figures do not preclude the possibility that varieties are being grown in localities for which they are not recommended. The importance of growing varieties recommended for the various soil conditions should be considered by all farmers when plans are being made for sowing operations.

Seedtime and Harvest

It was noted a year ago that the number of cars of wheat graded smutty had shown a marked increase over the year before. The government and commercial organizations expressed concern over this condition and preventive measures against smut were immediately instituted. However, the number of cars graded smutty during the 1944-45 crop year was considerably less than the record of the previous year.

A tabulation of the number of cars graded smutty in the past four years is given below. The largest increase in smutty cars occurred in Alberta, with a large increase in Crop District 6, but the most dramatic increase was in the Peace River district. The increase in Saskatchewan was general except in the north-central and northern districts where the increase in smut is becoming widespread and that it will increase even further unless immediate steps are taken to control it.

DRIVERLESS TRUCK DEMOLITIONS DEPOT

DID YOU HEAR? The front of the Valley Inn Depot was demolished Tuesday evening when a six-ton truck crashed into it. The truck was parked about 10 feet from the office of the hotel. The body was torn how it started and headed directly into the bus building.

Visitors to the depot for a year-round sales outlet say the way was more effective than a barge boom in London. Fortunately there were no waiting passengers as a load had just come in.

It was stated that the truck was seized by the sheriff earlier in the day and was left parked on the lot outside the office.

An old lady who works at the demolition of Salan Wall, she said police costs nothing and one never knows.

A Successful Advertiser's Ideas

John Wannamaker, founder of the John Wannamaker store, Philadelphia, was the first advertising genius in the retail advertising field. In addition to the novelty of his advertising, he kept persistently at it. He once said:

"Continuous advertising, like continuous work, is most effective. If there is any enterprise in the world that a quitter should leave alone, it is advertising. Advertising does not jerk; it pulls. It begins very gently at first, but the pull is steady. It increases day by day, year by year, until it exerts an irresistible power. To discontinue your advertisement is the same as taking down your sign. I would as soon think of doing business without clerks as without advertising."

WANNAMAKER WAS RIGHT, AND HE PROVED IT BY BUILDING UP A BIG BUSINESS!

FOLLOW HIS EXAMPLE BY ADVERTISING PERSISTENTLY AND CONSISTENTLY IN

SENDING OUT FILMS OF FARM INTEREST

Illustrating Better Methods For Dealing With Agricultural Problems

In helping to keep Canadian farmers informed on matters of special agricultural interest, the National Film Board is sending out films on topics ranging from large-scale potato cultivation to large-scale soil conservation and irrigation projects for showing on its monthly Rural Circuit programs.

Because the exhaustion of soil by careless cultivation over a period of years is being distributed on these Canadian films, the Board is encouraging a more far-sighted attitude towards conserving the source of Canada's agricultural wealth. A recent National Film Board production in colour, "Soil For Tomorrow," gives an account of the impoverishment of western land through over-production during the early days of settlement and describes the restoration measures taken under the Prairie Farm Rehabilitation Act to prevent drifting and make the best use of available water supplies. "Life On Water," made also in colour, shows the effect of drought, severe ice and forest depletion on Canadian wild life.

Other films demonstrate practical details of farm management, such as the way to build a hog feed-fence, or prepare small grain for planting. The National Film Board cooperates closely with Departments of Agriculture in both the production of films on farming and the distribution of bulletins issued by these Departments on subjects related to the films shown. And the films have been shown, via educational channels, to opportunity to locate local farm problems. Frequently, agricultural field representatives are present at the teaching and advice and information on the assistance available from their departments.

Lack of Discipline

Blame For Juvenile Misbehavior Must Fall On The Schools

Lack of discipline and absence of respect for authority may be seen in the recurring strikes by students.

The latest example was at Cambridge, where students struck in protest against the expulsion of another student from school. Previously several strikes had taken place in Windsor, presumably in sympathy with the Ford strikers.

In Toronto there was the outbreak of school belligeranism, and during the past year school windows were broken to the extent of \$2,000 a month. The culprits were mostly youths and petty thieving by juveniles occur with shocking frequency. The fact that strikes are distinct from demands to improve working and fragrant violations of the law does not refute the evidence that they are underhanded and disrespectful symptoms of defiance.

With development of character and quality largely dependent upon boys, we must insist that parents of juvenile misbehavior must fall mainly on the schools. The principles of honor and honesty, of sportsmanship and fair dealing, of cleanliness, of courtesy, study, observance of law, and other qualities which can be rebuked without endangering national security have been included, and that their information in the schools will be used solely to educate to enforce conduct, the teachers are drilling poor material and little else.

It is time that parents not only enforce their own authority but also support the authority of teachers. Too many parents are too lenient in indulgence than sense rushed to act against the spanking of their children. If parents do not tell their parents told their children to do exactly as they were told at school, and if they didn't, they'd get the hide of it.

Too much psychological and political bairdship has been said about children, and the result is that personalities, about their egos and free expression, are being beaten by the wealth and beauty of the country, their parents' status, as the fathers and custodians of democracy.

At the moment too many of the dandies are little brats with a great deal to learn.—Toronto Telegram.

PAPER GUN

Most cities of United Kingdom newspapers, The Times, is now sent by air to Central Europe. Its morning editions are all sale the same day at 10 a.m. in far-off Vienna. For a considerable time past its air edition has been flown to Canada and the morning editions are copied reaching New York by air are circulated to subscribers by ordinary mail—Ottawa Citizen.

END OF JAP SUB

Approximately 100 Japanese ships had surrendered have been burned by United States forces in Japan, once-powerful enemy naval base. The submarines, of the two-man type, were captured intact. They were piled in the bottom of a dry dock and covered with other waste material and scrap.

WE'RE STILL BREATHING

Come to think of it, says the Brandon Sun, those old-fashioned folks who lived when railways were invented said it would be impossible to breathe going 20 miles an hour.

FEAR OF SNAKES CAN EASILY DISAPPEAR—Mary Heaton, who attended several science classes, demonstrates that snakes are something that one can cultivate a friendly feeling for. For fear of snakes is said to disappear under proper science teaching.

For Small Sum

Londons Can Buy Atomic Bomb
All About Atomic Bomb

While conference halls resound to discussions of who shall and shall not have the secrets of the atomic bomb, the public can buy a copy of "How to Make His Majesty's Stationery Office, lay down 2s 6d (55 cents) and get a book which contains all the "secrets" of his arm.

A booklet, "Atomic Energy," traces the story of development of atomic energy in the United States with the help of Canadian and United Kingdom scientists. It first came out in 1945, by the Canadian Government, which permitted republication by the stationery office at London. It is a general account of the work done, which was made, was a point controversy in the United States during the war. Farm, state congressmen and agriculture committees the almost project to promote the use of grain alcohol.

G. E. Hadlock, associate editor of the stationery office, told reporters that the reason for abandoning alcohol in favor of petroleum as a button-down source "is purely

"Our cost of buttadane this year," he said, "was about 40 cents per gallon, which compares with eight to 10 cents per gallon from petroleum.

That made the cost of alcohol synthesized rubber around 24½ cents per gallon, compared with 12½ cents per gallon from the petroleum butadiene plants on the Gulf coast.

But we have to have a market for our product, and that is the only plant actually making butadiene," he said. "The stationery office said the butadiene had been taken calmly. Nearly 15,000 copies have been sold, nowhere near a record.

Plenty To Spare

Canadians Will Not Suffer By Sending Food To Europe

While we in Canada are naturally interested in the food situation, we should not let anything the United States may do to us from our purpose to help feed Europe.

Mr. C. E. C. Snyder, attorney general of Ontario, said that we can feed the Canadian people well and have large quantities of foodstuffs left over, even after we have given up to the British, but will send to Europe as well. We have been told by persons in authority that this winter will be the worst on record, and that we can do all we can to alleviate the hardships of the people here.

Mr. Snyder said as far as to say (and the record bears out) that we have not been told what we can feed the Canadian people well and have large quantities of foodstuffs left over, even after we have given up to the British, but will send to Europe as well. We have been told by persons in authority that this winter will be the worst on record, and that we can do all we can to alleviate the hardships of the people here.

Russia Awaiting To Buy Tools And Food From Canada

Canadian industry should be able to supply "the major part" of Russia's post-war needs, according to the Canadian ambassador to Russia, "commodore" George Zaroukin.

Additional to the British Columbia Regional Congress for Canadian-Soviet Friendship, Mr. Zaroukin said Canadian factories and manufacturers are prepared to supply 95 per cent of machine tools and food products to Russia.

"The Soviet Government is doing its utmost to extend trade with Canada," he said.

The word parliament is derived from the French pastier, meaning to speak.

A Tropical Paradise

Trinidad Is Most Interesting Island In British West Indies

The following article, Rev. Canon J. D. Ransome, M.A., of Trinidad, E.W.I., appeared in the Montreal Star:

The islands and sun are interchangeable terms. These tropical islands are fragments of perennial summer, when the sun comes off, the moon comes on. The days are warm and bright, the nights filled with the mysteries of a thousand stars, the breezes cool, the breezes breezy. Birds, butterflies, trees, and flowers compete with the sunlight to cast upon the island a mantle of color brighter than any seen anywhere by any other part of the world.

Of these islands, Trinidad is the most interesting and interesting by reason of its riotously colorful scenery, its exclusive products, and the contrast but charming racial diversity of its population. But perhaps the beauty spots that haunt the memory: there are a few things almost universal, such as the native country does, and the various elements of its primitive cover it into a veritable ethno-pictorial Negro, Asian, Indian, Chinese, European—in short, representations from the five continents of the world can be found on the hillsides of almost any spot. For Trinidad is a miracle of racial fusion; it is a cosmopolitan with capital "C."

As far as I can see today, this most southerly of the West Indies is the scene of romantic mystery by night. Native girls, in their dresses, take their cue from Native romance, it is in their blood. The sun there is as pleasant and affectionate as the moon is cool and mysterious; while, the tropical magic of its evenings is enhanced and made fancy by the soft, mysterious flickering fires which light the sunsets and grass into a jungle of tiny lights.

One pitch lake is one of the most famous of the West Indies, and a most immortal but ill-starred Elizabethan adventurer, discovered it. On his luckless quest in quest of the legend of El Dorado, the Spaniard wrote prophetically that all the sons of men would come to it with its oil, "but it will not be with the sun as it is with Norway." Bone fragments and a tooth of a mighty mastodon, found in the lake, were the last remains of the hunting primates when animals roamed the locality and sank into the mud because of their enormous weight.

In 1928 a tree gradually sank from undergrowth and was believed to have been buried in the pitch five thousand years ago. It emerged to ten feet above the surface, and when it was cut down it appeared as slowly as it showed itself. It has not since been seen. The lake is deep and still, and fills a basin as fast as it is filled. We call it "gold," for it is a very precious mineral that paves the highways of the world.

But here are some facts. Did you know that there are 100,000 monkeys and millions of bats of all kinds? That help to scatter the seeds of fruit, and coffee cups of Canada, and that is the greatest oil producing country in the world?

Did you know that most of your grapefruit, cacao and coffee come from us, and that we are the greatest oil producing country in the world? And did you know that most of your batik, cocao and coffee come from us, and that we are the greatest oil producing country in the world?

Did you know that the largest oil refinery in the world is in our part of the world, and during the war the United States from time to time shipped oil to us from the greatest entrepot of the Caribbean?

Let us not forget that without air force, we have not had battles, won, and without battles and Trinidad, whence the Wrights had their first flight, there would be no airplane in the world.

Our oil is the largest in the world? And thus our little island played a big part in our glorious victory.

PICTURES RETURNED

The American Military Government in Berlin has returned to the Western Museum of Art pictures valued at \$30,000,000 discovered in a salt mine and representing most of a famous American collection, Vienna radio said.

Canada needs more population. In the post-war years we are likely to get unless we put up bars against immigrants, a thing we are most unlikely to do.—Lebordeur, Herald.

POLICE TRYING TO SMASH CRIME WAVE

Which is Rolling Across Europe, Frequently Invading Youths

Military and civilian police in half a dozen capitals were trying to make a crime wave frequently involving hundreds of high school age, which is rolling across Europe in the wake of war.

French and former enemy territory alike came reports of murders, robberies, disorders and juvenile delinquency which were growing in number as each wave struck the damaged and often helpless cities.

Several young terrorists were being held on charges of robbery and looting in Berlin after a night raid by American and Russian secret police, aided by German civilian police, trapped them in the ruins around Anhalter and Potsdamer railroad stations.

In Moscow, criminal police caught a band of five burglars, aged 14 to 18, who had made eight daring housebreaks this year, stealing property worth 290,000 rubles.

British authorities are taking drastic steps to combat lawlessness which developed in the capital during the war. A series of widely publicized demonstrations trials, probably will be held to teach young men the old axiom that crime doesn't pay.

Armed policemen are making nightly rounds of Moscow's side streets, dispatches said, and armed military patrols have been increased. Long distances are now marked by a growth of lawlessness. Scotland Yard has reinforced street patrols of the anti-slum "black and tans" who are getting more radio patrol cars on the streets at night.

Special officers are being made to handle the thefts from fashionable West End apartments. Police said just now thieves are trying to smuggle jewels at inflated prices on gems have doubled.

Young authorities in Berlin were particularly disturbed by the number of youths involved in crimes. One gang of food-store robbers was led by a 15-year-old boy and included a lad only 13.

All Treated Alike

Even Officials Order Right Type Of Immigrants

Major Gen. Charles G. Gandy, commander of the Canadian Army Occupation Force in Germany, was held up for two hours at the German frontier before he was allowed to cross to Holland to cross the border into Holland.

New orders require individuals desiring to cross the frontier in either direction to obtain an order either by a major-general or else to give two weeks' notice of intent to move. The Canadian General staff pointed out the fact that the carrier documents as well as normal badges to establish his identity and rank the guard at the frontier of the occupation force so that the staff could identify him.

The general finally got permission to cross and arrived at Amsterdam.

Heart of Parliament

Visitors To Westminster Look At Historic Spot With Respect

Visitors to Westminster, having sent a card to the Member of Parliament, are admitted to the bright central hall with the right to feel they are at the heart of the mother of parliaments. In fact, Canadian officials explain that an intricate rose pattern in the floor directly under the main tower represents the coat of arms of the Commonwealth and Empire. They say that this point is the center of the British Empire, the British Isles and Canada, and that in spirit the parliaments of all lands which observe the British tradition of government look towards this spot with respect.

USEFUL INFORMATION

Don't wash your precious eggs until just before using them and you will find the protective film on the shell which makes them fresh.

Cracked egg is a casualty which can be saved. Wrap it in waxed paper with the ends twisted tightly and it can be heated and served. Boiling hard-cooked eggs dip your knife in cold water and the yolk won't crumble.

THE FIRST NEED

Canada's Mr. Howard, in the future will manufacture many articles never made before. Meanwhile the people would welcome larger production of such old-fashioned things as stockings, socks, men's shirts and naps says the Ottawa Journal.

DANGEROUS WAR MEMPHIS

War souvenirs are often perilous objects, whether used as curios in the home or picked up at former training centers. That means that the use of such old-fashioned things as stockings, socks, men's shirts and naps says the Ottawa Journal.

A new fountain pen will write for two years "without being filled." That means it is sure to appear and ask: "How long will it write?"

There were just 105 sheep in Australia in 1792.

WORLD HAPPENINGS BRIEFLY TOLD

Precious employment is being found for the mine-detector by using it to remove nails in salvaged timber before it goes to the sawmill.

A bright blue stamp issued in Canada in 1888 was sold for 270 (\$1.315) at Sotheby's, Bond street, London. The stamp was originally priced at ten cents.

The skeleton of a giant, with a skull thirty-three inches across and weighing one thousand three hundred pounds has been found in the steppes of Soviet Central Asia, north of Hemuvalay.

In addition to the maximum speed of vehicles from 30 to 20 miles per hour for an experimental period of two months was approved by the accident prevention committee at Edinburgh.

Stuart Hibberd, chief announcer, has celebrated his 21st anniversary with the CBC. In that time he has broadcast more than 1,000 hours and says he is still "a little nervous of the microphone."

Development of a jet-propelled aircraft which could be used aboard landing craft and of a twin-engine fighter with a range of 2,500 miles has been announced by two aircraft firms at Los Angeles.

The Vancouver Star, in its newspaper page story, said that Vancouver's airport will be used soon after the end of 1946 to train Trans-Canada Airlines' new crop of crews for its giant passenger planes over the Pacific.

A committee to watch developments in the utilization of atomic energy for peaceful and domestic purposes has been appointed by the International Executive Council of the World Peace Conference. It was announced at the meeting in the Ceres language. The book will include 300 to 400 hymns.

Food For Britain

Will Be Necessary for Canada To Send All She Can

Of the advisers to the Canadian delegation at the Canadian-American conference on the International Labor Organization in Paris, Mr. Bert Shorthouse, returns to Canada after seeing for himself conditions in the United Kingdom in France. "Send Kitchen food to the people in the Old Country," he says.

He adds: "The government of Canada hopes to do, certainly as far as meat is concerned. This is emphasized in the statement made by the Canadian delegation to the United States has discontinued the rationing of meat. Canadians will be asked to make a determined effort to send all possible of the most needed foods in Europe, of which meat is the main item. If the meat that must be sent is obtained in Canada, there will be no objection from the vast majority of consumers."

The rationing of meat, sugar and butter is coming to be recognized as giving ample substance to a point of view that can not be made during the past six years of war. Whatever the United States may feel impelled to do in the distribution of meat, the same applies to the Allies; rationing in Canada helps to promote the recognition of Canada's obligations abroad. It is also a guarantee of the distribution of available supplies to the consumer at home—Ottawa Citizen.

Research Station

England Has Most Up-To-Date Equipment For Atomic Energy

The machinery and equipment to be installed at the British Experimental Station for atomic energy at Harwell, England, is the most up-to-date in the world, reports the London Daily Telegraph. The paper states that although the United States has a similar plant, it is understood that they have no experimental station carrying out research in atomic weapons with Britain. It is believed that Britain has maintained world leadership in scientific research on atomic energy. United Kingdom scientists have been prominent in the years of research which culminated in the production of the atomic bomb. Dotted will not be a nuclear power plant, but a government research establishment—St. Thomas Times-Journal.

LEGEND OF SULK

Next to wool, silk is the most important of animal products used in weaving. In all probability it was in China that the legend of the sulk area without a single newspaper. Now that plant and material have been obtained from Sweden and England, the sulk has disappeared. Be careful to carry reading matter for the non-literary residents of Norway. An old legend—Norwegian Information Service.

SUN.	MON.	TUES.	WED.	THUR.	FRI.	SAT.
Meat Lamb Chops	Eggs or Lox King	Veal Curlets	Steak and Kidney Pie	Fish	Sausages	
Group C 3/4 lb. 3 tokens	Group C 1/2 lb. 2 tokens	unrat- ioned	Group B 1/2 lb. 3 tokens	Group B 6 oz. 2 tokens	unrat- ioned	Group D 1 lb. 3 tokens
3 tokens for lunch problems or next week's roast.						

Menu planning need not be fog-bound by meat rationing. Within the bounds of a twosome's weekly ration there is enough scope for gastronomic enjoyment and variety.

In purchasing the purchases it will be found useful to translate the ration in terms of tokens, eight of which are equivalent to one pound of meat.

With hospitality a weekend key-note, an extended meal suggested for Sunday. A lamb chop, for instance, costs 3 tokens. For Thursday two tokens worth of round steak supplemented with unrationed kidney will provide the makings for a meal of steaks and kidney. A lamb chop with taste, add some celery seed to the pastry or biscuit dough. Friday, a lamb chop with a bill of fare. Three tokens are ration currency for one pound of sausages, a double duty meal consisting of a hearty dinner and plenty of gravy. Sunday's breakfast. The week's expenditure is thirteen tokens. Add to this with your old friend a new guise, bake it in a ring mould, turn out on serving platters with added bacon, cream and suitable seasonings. To give the Lamb chop makeable eating for two tokens on Monday. And eggs are suggested as a basis for Tuesday's protein diet. Ham and eggs combined with fresh mushrooms.

May Lose Its Fame

Scholar Thinks Gray's Elegy Was Not Written At Stoke Poges

Stoke Poges has had it. Until everybody "knew" that Gray wrote his elegy here, he was considered a poet in the Buckinghamshire village.

For generations students of English literature have been taught that it is pretty much certain that Stoke Poges is that immortalized in the poem, the poet himself is buried there.

Now 17-year-old John — Sanford Lewis, of Merchant seafarers at St. Andrews, Scotland, has done his researches at Upton, near Slough, that it was there Gray heard the sound of the knell of parting from his mother.

Now, Ty, Jr., has grown to manhood, married to a family, and lives in Dublin, Ireland. One day ago, he was out hunting with a friend, a river which flows through the central part of Georgia, and cut a piece of wood from a tree. On one, and on picking it up found it had a band on its leg which read: "Write John Miner, Kinnarville, Ontario." He had never heard of John Lewis, a Lincolns Inn barrister, who died in the spring of 1945. The verse of the song on the band was "Give unto the Lord the fruit of thy womb, the Twenty-third Psalm, first verse.

There is a tiny mangled tower stone, and Gray remarks in the Elegy that "I lay my mangled tower to the church at Upton is covered in ivy."

The curve of the ruined wall, the castle, five miles from Stoke Poges, and the bells could not have been heard from there. Upton is a mile distant.

Gray, however, believes the "ruin forefathers of the blantant hamlet" Stoke was a village. Upton, though now about 100 yards square, was a small hamlet, said Mr. Lewis.

Spokesman for Stoke Poges, the rector's wife, says: "This is all the more remarkable because we believe like to think there is not now and never has been any real continuity between us."

Stoke Poges also thinks Gray could have heard the bells if he'd listened hard enough."

Farthest North

Newspaper Printed In Norway Above the Arctic Circle

Far above the Arctic Circle is the winter of charred ruins which was once the Norwegian village of Finmarken. There stands an insignificant hut. This is the editorial offices, printing plant, and office of the world's northernmost newspaper, the "Finmarken".

The editor explains that this is not only the most northern town in the world, but also Norway's smallest. He is careful to point out, however, that the Finmarken which prints out the newspaper which the world's best read news-sheets. The war in Northern Norway together with the German occupation took its toll.

Now that plant and material have been obtained from Sweden and England, the hand-lances no responsibility whatsoever for injuries sustained by customers in their rush to have these premises at their disposal.

A FRIENDLY HINT

In a spirit of friendliness, a Fleet street publisher hung this notice over his door: "The hand-lances no responsibility whatsoever for injuries sustained by customers in their dash to have these premises at their disposal."

One-fifth of the whole human race lives in India.

THE CHRONICLE, CARBON, ALTA.

Terrible Threat

Bacteriological War Is A Greater Menace Than Nuclear Bomb

A new and terrible threat to the safety of mankind—surpassing even the atomic bomb as a danger—was revealed yesterday in New York. Behind the urgent desire of the United States, Britain and Canada to negotiate a ban on atomic weapons knowledge which might be used in warfare.

The new horror, described as more destructive and terrifying than the atomic bomb, is the use of biological weapons.

Such terrible sources say has been developed to the point where it can play a major part in any new conflict.

It has been known to skilled scientists that for the last few months or years the Soviet Government has at least one power extended and perfected knowledge of lethal bacteriological research to a point where it ranks among the most secret "secret weapons" which soon will be ready for mass production.

It is not known what specific country is responsible for development of the new weapon but State Secretary Byrd spoke openly at a press conference in a broad way.

He declared: "There will be no protection against bacteriological war, even a more frightful method of human destruction than the atomic bomb."

For all practical purposes, says the author of the utmost gravity, in light of the fact that Mr. Byrd took part in the recent Anglo-American-Canadian atomic bomb and scientific war-tales talks in Washington.

Scientific Fashions

Men On Northern Expedition Are Wearing Latest Winter Clothing

Stylish fashions in winter clothing will be worn by the men who participated in the Canadian army's "Operation Muskox" as they travel across Canada's northland in their snowshoes.

On the prairie pieces of clothing that will be worn is the "string vest" a net material designed for the Norwegians and permits circulation of body heat.

OUR COMPLETE SHORT STORY—

TILL WE MEET AGAIN

By SYLVIA Y. ENDLER
Copyright Wheeler Newspaper Syndicate

SOMEWHERE in that timeless river of past, the lieutenant knew that he must have something to live for, or go under. In another age, another time, there had been much of goodness and beauty to hold to—but now for the first time in his life. Then suddenly out of the mist, a face rose before him, smooth hair brushed in a strong wings from a high forehead, eyes dark and warm, lips faintly parted and cool fragrant fingers.

She laughed at him, teased him, beckoned him, and sometimes there were tears, and once voices: "Quite a boy the lieutenant. He got the 'A' in all his subjects, and he can't even afford a bar for what's been through on this side." Then the first voice: "Well, I'll be in the final examination. Even though it will be right after this." But out of the whirling kaleidoscope it was only Dick Read-ing and the girl who had come to life again. Voices merged; she, the girl, was gone. However she came again in the dawning night, and in an instant, the shadows of the past had relented and some of the weariness and weariness had gone.

And the world had come to him, and somewhere in that endless night of pain and shining hair, serene eyes and graceful fingers, he knew he was in love with her, as many others were with life. She filled every lonely part of him, all their secret silent places, the boundless spaces where blotting out everything else—but the pain which had hovered over him till now, and for a space, slept. He lay back, his head on his pillow, to the gray dawn, and for the first time he knew that he would live.

THEN his days were filled with nurses and doctors, antiseptics, dressings, and needles, but he still slept, laughed and chatted with his companion. But mostly he sat for long hours in a dark room, watching the sunrises, in an agreeable restlessness where only the sun and the tapering shadows it cast were real. And the girl, the girl, was there, the recurring image of him in the world of fantasy, the bright, turgid, glowing vision of memory, the woman who was neither wife nor mother, nor any one of a hundred other remembered faces. Out of all other memories, erased by pain and terror, that yellow face had emerged triumphant from the shadows of the past, and he had come to safety and serenity. The meaning of it eluded and tormented him—but who can understand the depths of the human heart?—but he could see the fragmentary experiences of life. All he knew, finally, with impatience and impatience, was that he must fulfill the promise or destiny forever the dream. And the need to find strengthened his muscles and his mind until one day he was free to go to the ends of the earth to find this woman who had come to him.

His bag was packed, his uniform pressed, a fox fur made, like a man in a dream he walked out of the hospital, across the floor into the world. He had a ruling taxi with the word "cure" on it. Tucked in his pocket was a drawing pin. He stepped through the streets. Ticket in hand, he boarded the train, and still like a mechanical man, took the steps leading down to the dining-room, where he ate, slept, he smoked and changed trains and the wind whistled through the cars, farms and cities, and burning past, but he saw them not. His mind was filled entirely with the woman he was about to leave. In her last words, gentle hands on his forehead, and the comforting, cooing of bandages locked at the flames of pain.

And the world had come to him, and somewhere in that endless night of pain and shining hair, serene eyes and graceful fingers, he knew he was in love with her, as many others were with life. She filled every lonely part of him, all their secret silent places, the boundless spaces where blotting out everything else—but the pain which had hovered over him till now, and for a space, slept. He lay back, his head on his pillow, to the gray dawn, and for the first time he knew that he would live.

RECIPES FOR PUDDINGS

According to an old proverb the proof of the pudding is in the eating—and now is a good time to test the truth of this statement. Every year the world is whetted by the crisp winter air, and ice cream and sherberts that were so popular in the good old summertime are taking a back seat to the more substantial and heavier desserts. Cold weather puddings are usually baked or steamed and served hot or warm, but the best puddings are steamed. Steamed fruit puddings are frequently made and stored with the idea of reheat when desired. Here is a mincemeat pudding which you will enjoy at this time of year.

MINCEMEAT JIFFY PUDDING
2 cups prepared mincemeat
1/2 cup brown sugar (*)
2 tablespoons flour
1/4 teaspoon cinnamon
3 tablespoons butter
1/2 cup milk or cream
Spread mincemeat in a greased pan. Combine sugar, flour, and cinnamon with butter and mix well. Add to the mincemeat. Crumble over mincemeat. Pour milk over the mixture and bake in a moderate oven (350° F.) about 30 minutes. Serve warm with cream, if desired.
Yield: 6-8 servings (5 x 2-inch pan).
(*) Sugar may be increased or decreased depending on sweetens of mincemeat.

Eight light buns will supply an average household for two years. Batches of 7,000 buns in socks and two spares for each one in use, or a total of 21,000.

Blazing Oil

Threatened A Whole Village When Enemy Planes Scored A Hit
Blazing oil cascading down a hillside incinerated a whole village when one enemy plane attacked the Admiralty fuel oil installation at Pembroke, Dorset, on August, 1940, setting off 16 bombs which exploded most protracted oil fire of the war.

This and other big blazes of the war were recalled by V. J. Wilmot, former manager of the Institute of Petroleum. In May 1944 when enemy planes bombed Swanage oil installations, firemen racing to safety dove into a small stream in the valley below imperiling a number of nearby houses.

Cottages were evacuated, barricades of empty drums and earth were built to confine the fiery overflow when the fire was overcome after 21 hours.

The Thames Estuary was the scene of a fire which started 5½ miles offshore when an American B-17 bomber hit a direct hit was scored on a large freighter Sept. 10.

During a four-hour stay Sept. 11, the fire was brought under control and this lasted for 2½ days.

Mr. Wilmot disclosed that when war began 90 per cent of Britain's petroleum stocks were stored in some 50 major installations.

Frock And Toy

4970 SIZES 2 to 8

A surprise package for a little girl. Pattern 4970. A lighted heart-shaped envelope containing a dress pattern for a frock and, for a tots' special treat, a stuffed toy bunny!

Cost: 15¢ dress, 1½¢ bunny, ½¢ yr. old.

USAC, scrap or remnants for a coat.

Send twenty cents (20¢) in coins and postage to: Mrs. E. G. Adams, 1757 Winnipeg Newpaper Union, Mdn.

REFUGEES MOVE

The movement of refugees from Great Britain is a shadow of those who left before the German invasion. It is still going on. Many thousands of persons from more than 30 countries have come to Britain since the war began, preparing to return to their homelands. Last to go are the German exiles.

Gleanings from the Post.

GOING TO THE LISTOWEL, ONT., COAST, Canada, the first contingent for bombed Britain will start Sunday, June 11.

Purfume units will remain in the coast town of Collingwood, where a Kitchener camp has been taken over an aircraft plant. Production is expected to total 150,000 units in the project which will involve millions of dollars.

The Pipirki Camp, Sentinel-Star makes a pertinent point. "We feel that the people of Canada are more conscious of the challenge of modern youth than is indicated at the present time. Think of the influence the church has had on youth, if it would, and what young people could do for the Christian church by staying in Britain. There is strength and vitality in that direction. Let our parents, our youth and our churches give their sons and daughters to the church which exists here. The matter is much too important to be neglected."

* * *

Mrs. Sentinel is perturbed because another series of British cancers is breaking out. This town, according to "can we help it?" seems to have, because it doesn't bother us much."

Wonder what he means?

* * *

THE LIMA, LINN, Mrs. Margaret McLean of North Kamloops

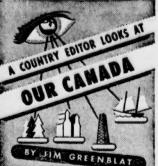

celebrated her 90th birthday, June 10, and hearty, keen interest in all she does. She was born in the Hudson's Bay old Fort Kamloops.

HIS RECIPES FOR LONG LIFE

Captain John Howell, of the U.S.A., who is 104 years old and fought on the side of the South in the American Civil War, gives this advice for long life: Eat well, exercise well, eat three square meals a day, keep your chin up and your temper under control, and make the 23rd Psalm part of your daily life."

The bayonet is said to have been invented in Bayonne, France, in the 17th century.

MOST OF US DON'T KNOW

Hardly anyone—not even the publisher—knows how important a newspaper is to a community.

The smaller the town or village, the more important the newspaper is in its economic life. Its news, editorials and feature stories focus the interest of surrounding territory on the place in which the paper is published.

This force and the force of advertisements by local merchants build an ever-widening trade area. This means more business, more money for schools, homes and churches—a bigger and better town.

A town with a newspaper is a town with a future. The better the paper, the brighter the future.

It deserves the support of every business man in that town.

We are trying to make this paper worthy of our town. Your help and suggestions are appreciated.
